Building Values across the Whole School: A Resource Package

Friday, 5 October 2007

The Australian Government has funded the publication of *Building Values across the Whole School: A Resource Package* via this website. Part of the Values for Australian Schooling resource series for Australian schools, the package consists of two components: primary and secondary teaching and learning units and a professional learning program.

To access *Building Values across the Whole School: A Resource Package* from this website you will need the **access code key**. The access code key has been sent in a letter, to all Australian school principals, which arrived in schools the week commencing 15 October 2007. Australian schools may then download the resource package via the [Building Values across the Whole School: A Resource Package](#) page.

Values for Australian Schooling Kit

The *Values for Australian Schooling Kit* is an integrated package of resources for every school in Australia.

The *Values for Australian Schooling Kit* was delivered to schools during the second term 2006. The print materials from the kit may be downloaded from the [Values for Australian Schooling Kit](#) page.

Values Education Good Practice Schools Project – Stage 1: Final Report

The Values Education Good Practice Schools Project – Stage 1 (VEGPSP 1) involved the funding by the Australian Government of 26 clusters of schools from around Australia to design, implement and evaluate quality projects in values education which would reflect and utilise the *National Framework for Values Education in Australian Schools* in local contexts.
